DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-4, 9-13 and 15-16 have been considered but are moot in view of the new ground of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3, 9-11, 13 and 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Umeda U.S. Patent No 5,998,903.

Umeda discloses an alternator a rotor (3) having a plurality of N and S poles alternately arranged in a rotating direction, a stator including a annular stator core (32) surrounding the rotor and provided with a plurality of slots, and a multiphase stator winding embedded in the slots and a frame (43, 44) supporting the rotor and the stator. Umeda disclose the claimed invention except for how the stator winding is formed.

However, how the stator winding is formed does not germane in the patentability of the device it self. Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art,

Art Unit: 2834

the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Umeda U.S. Patent No 5,998,903 Richter et al. U.S. Patent No. 4,427,910

Umeda, disclose the claimed invention except for the stator winding being fixed in place by inserting magnetic wedges in the slots. However Richter discloses a stator having a magnetic wedge (3) in order to holds the stator windings in the slots formed between the teeth of the stator. Therefore it would have been obvious to one having skill in the art at the time the invention was made to modify Umeda's invention and provide a

Art Unit: 2834

magnetic wedge in the slots since that would have been desirable in order to hold the stator windings in the slots formed between the teeth of the stator as taught by Richter.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
